

Galil SAR Pistol

Brand:

Product Code: Galil SAR Pistol

Availability: In Stock

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Call for Price: 804-800-5180

Short Description

The Galil SAR Pistol built by Southern Tactical is based off the Original Galil SAR from IMI in Israel. These pistols are built using Good Condition or better Military Surplus SAR parts. This Galil SAR pistol built uses a high quality Tortort Milled Receiver as the core of the pistol with a U.S. 13" barrel, threaded at 13mmx1 RH(same as the original from IMI). Each pistol ships with an original IMI 35 round metal magazine and an M4 Buffer tube adapter, for those that want to create an SBR(with BATFE Form1 Approval of course). Southern Tactical wanted these builds to look as close to the originals as possible and took the time to mark the receivers as they would have been marked in Israel, with Hebrew selector markings, as well as other receiver marking to mirror the originals. To top the builds off, these are finished with a durable Manganese Phosphate base finish with a black Teflon top coat. Please Note, Original parts may show usage character. Galils are designed to work best with .556 ammo.
